

PERSONAL INFORMATION

+90 545 348 04 31
harunemirhan826@gmail.com
Palandöken, Erzurum
2002

SKILLS

Core Technical Skills

Machine Learning, Deep Learning, NLP, Ensemble Methods, Predictive Modeling, Feature Engineering, Model Evaluation

Frameworks & Tools

Scikit-learn, TensorFlow, Hugging Face, LangChain, Pandas, NumPy, SMOTE

Programming

Python (Advanced), SQL, Java, C

Analytics & Visualization

Data Mining, Statistical Analysis, Plotly, Matplotlib,

Professional Skills

Problem Solving, Algorithm Design, Team Leadership, Project Management

Language

English: Intermediate to Upper Level

CERTIFICATES

- Data Science & AI Summer School, Coderspace (2024): Developed Scoutmaster (football player valuation tool).
- Project Management Internship, SCA & TNC Group (2025): Specialized in IT Law (KVKK) and AI Project Strategy .

HARUN EMİRHAN BOSTANCI

DATA SCIENCE & AI RESEARCHER

PROFILE

Computer Engineering candidate focused on Data Science and AI. Experienced in Python-based ML, large-scale data analysis, and end-to-end AI solutions; currently finalizing graduation requirements.

EDUCATION

ERZURUM TECHNICAL UNIVERSITY OCTOBER 2020 - NOVEMBER 2025

- Core Focus: Data Science, AI, NLP, and Algorithms.
- Technical Skills: Proficient in Python, Java, and C.
- Interdisciplinary: Robotics and hardware-software integration projects.

PROFESSIONAL EXPERIENCE

Lotus AI Yapay Zeka Çözümleri SEPTEMBER 2025 - NOVEMBER 2025

Data Science & AI Intern

- End-to-End ML (CRISP-DM): Developed 5 projects including energy forecasting, phishing detection, and network traffic analysis using both Python and KNIME.
- Advanced AI & ETL: Implemented 100+ SQL/Pandas queries and conducted comparative research on RAG vs. CAG architectures for enterprise LLM solutions.

SCA SOCIAL

JUNE 2025 - JULY 2025

Project Management Intern

- Project Management: Completed professional training in management, organization, and project strategies.
- IT Law & Compliance: Conducted case studies on KVKK (GDPR) and data privacy regulations, drafting legal compliance reports .
- Corporate Leadership: Applied organizational theories through executive simulation tasks and strategic planning .

Acun Medya Akademi

JANUARY 2025 - JULY 2025

AI & Python Training Intern

- Completed intensive hands-on training in Python programming for AI applications
- Developed practical projects focusing on data preprocessing and model prototyping

ICED Company

FEBRUARY 2025 - JUNE 2025

Data Processing Intern

- Preprocessed and cleaned large-scale datasets using Python (Pandas, NumPy)
- Implemented RAG framework and FAISS embeddings for efficient legal document retrieval
- Developed a prototype AI tool for lawyers that analyzes legal problems and retrieves relevant precedent cases

Takimada

SEPTEMBER 2024 - SEPTEMBER 2025

Part-time Data Labeling Specialist

- Annotated diverse datasets for ML projects to improve model accuracy through high-quality data curation

Mucitpark ETÜ

NOVEMBER 2021 - OCTOBER 2022

Part-time Instructor

- Mentored primary/secondary students on multidisciplinary robotics, Arduino coding, and project-based engineering workshops.

COMPLETED PROJECTS

- FraudEye: Credit card fraud detection system handling class imbalance with SMOTE. Processed 450K+ transactions using Random Forest and XGBoost. Achieved high AUC through rigorous feature engineering and model tuning.
- ScoutMaster: Football player valuation tool using performance metrics. Implemented regression models with feature engineering and cross-validation. Focused on practical scouting applications.
- GameGain: In-app revenue prediction from user behavior data. Utilized RFM analysis and time-series forecasting. Processed 10M+ events with Pandas and Scikit-learn.

ONGOING INTERESTS

- Actively participating in Kaggle competitions focused on data preprocessing and machine learning solutions.
- Deepening expertise in data augmentation, synthetic data generation, and classification techniques.
- Sharing knowledge about data science through blog posts and projects.
